DETAILED ACTION

1. The Preliminary Amendment filed on 01/22/2002 has been entered.

Election/Restrictions

2. Applicant's election of Group II, claims 24 and 25 in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Information Disclosure Statement

3. The information disclosure statements filed 01/22/2002 and 02/26/2003 have been considered.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 24 and 25 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification does not disclose the surface region has a sheet resistivity greater than $100 \Omega \text{ m}^{-1}$ immediately prior to the anodizing step as recited in claim 24.

Art Unit: 2826

Note that lines 16 and 17 on page 13 of the specification only disclose that after ion implantation, the front face had a **sheet resistivity of $1800 \Omega^{-1}$** , compared with an estimated value of **$10 \Omega^{-1}$** if the dopant had been fully activated.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 24 and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 24, lines 9-11, what does applicant mean by "at least a part of the region has an acceptor impurity volume concentration comparable with the solid solubility limit of the acceptor impurity in silicon **is satisfied**" ?

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minhloan T. Tran whose telephone number is (703) 308-4919. The examiner can normally be reached on Monday-Friday 9:00 AM-5:30 PM.
